Photography for Beginners

FINAL PROJECT

TASK

PRACTICAL TASK

For this task ensure you have set your camera to FULL MANUAL mode

Check your camera's manual if you are unsure how to change to this setting. Also check your manual to discover how to access your EV meter if it is not immediately apparent

You will choose your own ISO, Aperture and Shutterspeed settings for this task.

You should give yourself up to two weeks to complete this final project.

You need to create three photographs that tell a story, or communicate a mood. Your subject for all three images needs to be a fork (or many forks). You need to first decide what kinds of images you are going to create (dark, light, shallow/deep focus etc) and then choose your camera settings to create the images.

Ensure you have watched all three previous lessons and completed the tasks for each before doing this final project.

Good luck!

Upload your submission with your observations to the [Makers' Academy Students](#) group on facebook for feedback
